PROFESSIONAL SUMMARY

Detail-oriented and analytical fresher Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI for data collection, data cleaning, data wrangling, exploratory data analysis (EDA), and dashboard reporting. Skilled in transforming raw, large datasets into clear visualizations and actionable business insights that support stakeholder decision-making. Strong foundation in statistics, KPI tracking, and data visualization, with proven ability to deliver accurate, well-documented reports under tight deadlines. Seeking an entry-level Data Analyst role to apply analytical thinking and data storytelling skills to drive measurable business impact.

EDUCATION

Genba Sopanrao Moze College Of Engineering **Sep 2023 – July 2026**
B.E in Artificial Intelligence and Data Science (AIDS) Pune, Maharashtra

Ashokrao Mane Polytechnic, Vathar **May 2020 – May 2023**
Diploma in Computer Science Kolhapur, Maharashtra

RELEVANT COURSEWORK

Data Structures, Algorithms Analysis, Data Analytics, Business Intelligence, Machine Learning, Database Management (SQL), Web Development, Statistics, Data Warehousing, Exploratory Data Analysis, Data Visualization, Data Cleaning and Wrangling

EXPERIENCE

NeuAI Labs Pvt.Ltd **Dec 2025 – Jan 2026**
AIML Intern – Data Analysis & Reporting Pune, Maharashtra

- Performed data collection, data cleaning, and exploratory data analysis (EDA) to support AI/ML model development and reporting.
- Collaborated with technical and leadership teams to translate raw data into actionable insights for stakeholder decision-making.
- Conducted research and contributed to development, testing, and documentation of data-driven intelligent systems.
- Assisted in model evaluation and performance reporting, ensuring data accuracy and quality throughout the pipeline.
- Supported project implementation while ensuring timely milestone delivery and adherence to confidentiality standards.

Bigblock Infraworld Pvt.Ltd **Jan 2024 – Feb 2024**
Freelance Developer – Data & Web Analytics Pune, Maharashtra

- Analyzed user interaction and search data to optimize property listing discoverability and improve key engagement metrics.
- Developed a responsive real estate website enabling users to search and browse property listings.
- Designed a clean, data-driven user interface with HTML and CSS, ensuring cross-browser compatibility.
- Link to Live Project: bigblockinfraworld.in

Revolution IT Solution **Jul 2022 – Aug 2022**
Web Development Intern – Data Reporting Kolhapur, Maharashtra

- Analyzed website traffic data to identify loading bottlenecks and improve site performance metrics.
- Developed responsive websites using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with senior developers and contributed to UI optimization based on user data trends.

PROJECTS

Security Threat Prevention Using AI Agents | Python, FastAPI, SQL, LangChain **Working**

- Performed advanced log data analytics and statistical analysis to identify patterns and reduce false alerts.
- Built data pipelines and RESTful APIs to support structured data storage, reporting, and system monitoring.
- Designed a modular reporting architecture for monitoring, analysis, and automated decision support.

Sales Data Analysis Dashboard | Python, SQL, Power BI, Pandas, Excel **Apr 2025**

- Cleaned and analyzed sales datasets using Python and SQL to identify trends and business opportunities.
- Built interactive Power BI dashboards and KPI reports to support data-driven business decisions.
- Visualized business insights using charts, dashboards, and summary reports for stakeholder review.

Customer Insights Analysis | Python, SQL, Pandas, NumPy, Excel **Mar 2025**

- Performed customer data analysis and segmentation using Python, SQL, Pandas, and NumPy.
- Cleaned and processed large datasets to improve data quality, consistency, and analysis accuracy.
- Created reports and visualizations to support business decisions and customer segmentation strategy.
- Generated actionable insights that helped improve customer engagement and marketing strategies.

AI Smart Face Recognition System | Python, OpenCV, Pandas, NumPy **Feb 2023**

- Built a real-time data-driven face recognition system using Python and OpenCV for automated identity detection.
- Applied data preprocessing and statistical classification techniques to improve detection accuracy.
- Analyzed performance metrics and optimized the system for fast, reliable, real-world results.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C, JavaScript, HTML, CSS
- **Machine Learning:** Machine Learning, Scikit-learn, TensorFlow, PyTorch, Natural Language Processing, OpenCV
- **Data Analysis:** Pandas, NumPy, Microsoft Excel, Statistics, Exploratory Data Analysis, Data Cleaning, Feature Engineering
- **Generative AI:** Large Language Models, LLM, LangChain, LangGraph, Hugging Face, OpenAI, Retrieval-Augmented Generation, RAG
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **Tools and Frameworks:** Git, GitHub, Jupyter Notebook, Visual Studio Code, Streamlit, FastAPI
- **Databases:** MySQL, MongoDB

CERTIFICATIONS

- Data Analytics Workshop – 3RI Technologies (2026)
- Geospatial Analysis using Google Earth Engine – ISRO (2024)
- Placement Preparation Programme – IIT Bombay (2024)
- Web Development Internship – Revolution IT Solutions (2022)
